Bridge Beam Removal at East River Road Bridge

CHICAGO – The Illinois Department of Transportation (IDOT) announced that overnight lane closures and intermittent stops will take place on Interstate 90 and Interstate 190, under East River Road, in Chicago, beginning, weather permitting, Friday, May 13. The closures are necessary to remove existing bridge beams as part of the ongoing reconstruction project of East River Road bridge.

In order to complete the work, nightly lane closures and intermittent full expressway closures will take place on Interstate 90 and Interstate 190 under the East River Road bridge. The bridge beam removal is expected to last one week, weather permitting.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.
